

The issue to record all programming is wrong. Our station is local and airs programs like the Elementary School reading program or the ghost stories for halloween. Church services on Sunday and we carry information regarding the city and county. There needs to be a point where the Commission is realistic about the demands placed on broadcasters. The operators who care about the community and take care of local needs would never think of airing anything that does not agree with community standards.

Network TV, Cable and the National radio groups have cused this problem. A fine of any amount would cripple this operation and I take no chances.
